Secure holding

Bri-Stor Also has facilities to house 700 vehicles in our secure compound.

introducing Bri-stor

Bri-Stor Systems Limited was formed in 1983 specifically to design, manufacture and install storage equipment and security products in light commercial vehicles.

Our foundations originated from robust engineering principles pioneered through the business by our founder Eric Smith and backed with the latest manufacturing facilities, coating plant, assembly and fitting workshops.

In 2006 the Bri-Stor Group moved to new premises on an 18-acre site with over of 185,000sq.ft (18,000m.sq) of purpose-designed workshops. The move provides a secure environment in which the significant growth shown in recent years can continue.

The new facilities along with investments in the latest design and manufacturing technology have already provided advances in productivity.

With additional workshop space and a holding compound for over 700 vehicles it provides an excellent opportunity to expand the popular **Pronto** one-stop preparation programme and deliver unrivalled industry leading service at competitive prices.

From initial concept to final design and handover, we strive not only to meet, but also to exceed our customers' expectations.

We are proud of our customer base comprising of both large and small fleet operators from a diverse range of businesses and invite you to be part of the Bri-Stor experience.

The Easi-load Ladder System

Used by major utility companies & local councils

Rapid loading and unloading of ladders

Simple and safe to use, one man operation

Proven design, over 10,000 systems in use

Easi-load helps ensure current health and safety legislation is met
