## LPS. The green “Battery Generator”

Remove the use of generator or engine idling with the EasiPower Lithium Power Supply

Get remarkable savings in fuel and CO2 with a lithium battery based power solution. The LPS makes it possible to completely remove the need for engine idling or use of a generator.

### Lithium Ion Battery

Powerful 12V lithium Ion battery including BMS.

### Power Inverter

230V/50HZ pure sine wave output for power tools, battery chargers etc.

### Intelligent Charger

Fast and simple charging directly from the mains.

### DC-DC Booster

Efficient charging while driving - also in new vans with Euro battery chargers etc.

## Lithium Power Supply

LPS - Compact power supply with integrated li-ion battery

All-in-One 230V and 12V power supply charges quickly during driving.

### 6X FASTER CHARGING

One full charge of the EasiPower LPS completed in 45 minutes

### 6X LONGER LIFESPAN

2000 lifetime charges/ discharges compared to 350 in alternative traditional lead batteries.

### FUEL SAVING & Co2 FRIENDLY

Economic use of energy without engine idling, reducing both cost and pollution.

### COMPACT & LOW WEIGHT

Only 1/3 the weight of an equivalent lead battery.

## Compact, energy efficient, fast charging and a long lifespan.

That is what characterises lithium batteries. All these advantages are useful in service vans functioning as mobile work stations with on board power supply.

### The modern, green choice

Previously, there was only a choice between noisy gasoline generators or inverter systems based on lead acid batteries of dubious quality and reliability. Today, you can choose the green, noiseless and powerful LPS, now available in three variants: LPS 1500W-100Ah, LPS 2500W-100Ah and LPS 3000W-160Ah.

### All-in-one

An LPS (Lithium Power Supply) is a complex inverter system with a built-in lithium battery that works as a generator, but without the noise and pollution. The LPS is efficiently charged from solar panels, the mains or from the car while driving. It is also fully functional in new cars with Euro 6.
